

Ecology Seminar Series

Free public lectures addressing important ecological topics

October 6

Bernd Blossey, Cornell University

**How deer, worms, slugs, and
invasive plants are changing
northeastern forests.**

Hosted by Dick Casagrande, PLS

November 3

Charles Yarish, University of Connecticut

**Exploring food webs in aqua-
culture systems: An ecological
approach to cultivating both
seaweeds and fish.**

Hosted by Carol Thornber, BIO

December 1

Larissa Bailey, USGS

**Influence of habitat and
competitors on species
distributional dynamics:
examples using vertebrate
species.**

Hosted by Peter Paton, NRS

Weaver Auditorium, Coastal Institute Kingston, 3:00 PM.

Graduate student pizza lunch, 12:00 PM.

Reception outside Weaver Auditorium following the talk.

Contact the host to schedule a meeting with the visiting scholar.
